Conifers: *(evergreens)*

Austrian Pine A fast growing, adaptable evergreen taking moist or dry soils and suited for colder, drier climates. It's hardy in the wind and grows well in all soil types. Useful in wildlife habitat and windbreaks. Mature height 80'.

Blue Spruce A beautiful, slow-growing ornamental evergreen with distinctive blue-green stiff and sharp needles. The branches start at ground level making it an excellent plant for wildlife habitat and windbreaks. Mature height 100'.

Douglas Fir A moderate growing, large evergreen. Thick bark makes them somewhat fire resistant when mature making it an excellent wildlife tree; grows better in moist areas. Excellent Christmas tree. Mature height 150'.

Norway Spruce An extremely hardy and wind resistant evergreen. It's moderately fast-growing, has medium-green coloring and is useful for wildlife habitat and windbreaks. Mature height 150'.

Ponderosa Pine The Inland Northwest signature tree has thick, reddish, scaly bark growing well in difficult, dry locations. A native to the region, it's useful in wildlife habitat plantings, timber plantings, windbreaks and as an ornamental evergreen. Mature height 120'.

Rocky Mountain Juniper An upright shrub or small tree, this pyramidal evergreen has grey-green, scale-like silvery foliage with dark blue berries. It's very drought tolerant and is suited best in dry, rocky soils used mostly for wildlife plantings and windbreaks. Mature height 20'.

Scotch Pine A favorite ornamental evergreen is conically shaped becoming more rounded and spreads with age. Suited for the cooler, drier regions being useful in wildlife habitat plantings and windbreaks. Mature height 60'.

Western Larch A fast-growing, narrow, conical native deciduous evergreen with soft-light-green needles that turn a bright yellow in the fall and drop by winter. Requires moist, gravely, sandy and loamy soils. Mature height 60'.

Deciduous Shrubs and Trees: *(seasonally leafed)*

Caragana This large shrub is faster growing and has yellow-green narrow leaves, produces bright-yellow flowers, and seed pods making it a good choice for wildlife habitat. It's very tolerant of poor soils, drought and prefers direct sun; often used in wildlife habitats and windbreaks. Mature height 10'.

Chokecherry A small tree, white flowers with red to purple berries and dark leaves that turn maroon and gold in the fall. This small tree is drought and heat tolerant making it a good wildlife and windbreak choice. Mature height 25'.

Cotoneaster A large shrub with glossy, dark green leaves which turn to a shiny red fall color. It has white flowers and produces black berries. It makes an excellent dense screen for wildlife, hedges and windbreaks. Mature height 10'.

Honey Locust A fast-growing, upright spreading tree with tiny, bright green leaves that provide pods for wildlife. Tolerant of a wide range of soils and climatic conditions. Mature height 100'.

Honeysuckle A neat appearing, hardy and dependable, larger shrub with pale pink buds that open to white flowers. Used in wildlife plantings and windbreaks. Mature height 10'.

Lilac, Common A small tree with attractive lighter green foliage, used in landscapes and windbreaks. This variety produces fragrant lilac colored blossoms in May. Mature height 20'.

Lilac, Late This is a hardy, dense growing shrub variety that has darker green foliage, used in landscapes or windbreaks. This variety produces a very light rosy-lilac to white blossom 7-10 days later than other varieties. Mature height 10'.

Red Osier Dogwood A small, multi-stem tree that grows quickly. This bright red stemmed plant produces white flowers followed by white berries making it a good wildlife habitat choice. It's suited for riparian areas which makes it excellent for stream bank stabilization. Mature height 10'.

Rugosa Rose An extremely vigorous, hardy shrub with glossy green leaves, prickly stems, deep pink to white flowers and berries. These adapt well in drier, colder areas; excellent for wildlife habitat, hedges, erosion control and windbreaks. Mature height 6'.

Serviceberry A loose growing shrub with upright limbs that fan out at the crown. It produces masses of white flowers followed by edible blueberry-like fruit. Beautiful fall colors of burgundy red, orange, yellow; widely used for wildlife plantings and windbreaks. Mature height 10'.

Snowberry A fast-growing shrub for drier areas, small pink or white flowers followed by white berries through the winter. Excellent for wildlife plantings and erosion control. Berries are poisonous to people but not birds. Mature height 4'.
